

Services Provided by Giant Group's Biomedical Team

In the Giant Group, our biomedical team observes and analyzes domestic/international (major countries or regions) biomedical laws and regulations regularly for their latest trend to assist our clients in speeding up their search for related laws and regulations prior to new product development and marketing and cutting their incurred costs.

To serve clients confused by legal compliance or mystified by management issues, our biomedical team provides the clients with comprehensive services, such as giving professional advice to the clients and seeking advice from domestic competent authorities on behalf of the clients, thereby assisting the clients in solving problems.

Provide consultation on biomedical laws and regulations

To serve clients confused by legal compliance related to biomedical products and services, our biomedical team discusses with the clients in person to analyze regulatory requirements and assist the clients in coming up with customized solutions to legal compliance.

Search domestic/international biomedical laws and regulations

Our team searches domestic/international biomedical laws and regulations on behalf of clients and gives the clients resultant legal documents and excerpts in Chinese and English.

Draft and send advice-seeking letters on biomedical law compliance to competent authorities

To serve clients confused by legal compliance on domestic/international biomedical laws and regulations in terms of interpretation and application, our biomedical team discusses with the clients to draft and send advice-seeking letters on biomedical law compliance to competent authorities on the clients' behalf.

Hold seminars and organize courses on domestic/international biomedical laws and regulations

Our biomedical team holds seminars and organize courses on domestic/international biomedical laws and regulations to enable our clients to have a better understanding of biomedical laws and regulations, allowing them to gain insight into management trends and boosting their corporate competitiveness.
